> Americas

- > Mexico

Services

Vertically integrated system manufacturer with the following core competencies:

- > Design & Engineering
- > EMS
- > Cable assemblies
- > Mechanics
- > Mechatronics and box-build

Engineering

Our 150 engineers and technicians support every step of your development process across the entire product life cycle to ensure its success. Their specialist skills enable them to provide a very diverse range of applications, such as: electronics design, embedded software, high-frequency and communications technology, design and construction of test systems, support with various approval processes and classic box-build design.

Scaling

No matter what batch size - from one (prototype) to one million items or more - we can offer you cutting-edge production concepts. We specialise in a broad product range (high mix) and can produce any batch size at our international production sites.

The hardware of the digital world

From ambition to real products

A unique customer perspective

GPV is committed to ensuring that our customers accomplish more. We do this by building strong and trusting partnerships based on responsible and honest cooperation.

We acquire comprehensive insights into our customers' needs and industries, and we manage advanced and stable product processing, relying on our strong technological knowledge.

Stable. Specialised. Global.

In everything we do, we focus on creating value for our customers, and our approach is supported by the strong spirit of our organisation. As such, we always strive for a timely delivery of faultless, secure and functional products and services that fulfil the expectations and requirements of our customers.
